Panhandle Health District announces one additional case of COVID-19 in North Idaho

The Panhandle Health District (PHD) and Kootenai Health have confirmed one additional case of novel coronavirus (COVID-19) in Kootenai County, bringing the total number of cases to 11 in the Panhandle area. Details on the new case are listed below. The Panhandle area includes the five northern counties (Kootenai, Shoshone, Benewah, Bonner, and Boundary).

Case 11: Male in his 70s from Kootenai County. He is self-isolating at home. This case appears to be travel related. Contact tracing is ongoing.

PHD will plan to make a daily announcement if there are confirmed cases within the Panhandle at noon Monday – Friday.

In the United States, there have been 85,356 cases and 1,246 deaths as of March 27, 2020 according to the Centers for Disease Control and Prevention (CDC).

Epidemiologists with PHD are working to investigate cases of possible contact. All household members of confirmed cases have been asked to self-isolate at home for a prescribed period of time. If other people are found to have been exposed, health officials will provide guidance to these individuals and they will be asked to self-monitor for the development of symptoms.

PHD will continue to monitor the situation closely and are working with the Idaho Department of Health and Welfare, city and county leaders, schools, emergency management, healthcare providers, and our community at large to help prevent the spread of this virus.

People ill with this coronavirus in other states and countries have reported mild to severe respiratory illness with fever, cough, and difficulty breathing. If community members have these symptoms and they become severe, they should call PHD's call

center at 1-877-415-5225 or their provider. PHD will provide an over-the-phone assessment to determine if someone should be tested. Please call, do not come into PHD or your provider's office. Tested individuals must stay home until test results are received. If the test is positive, all household members must self-isolate at home for a prescribed period of time.

CDC does not generally issue advisories or restrictions for travel within the United States. However, cases of coronavirus disease (COVID-19) have been reported in many states, and some areas are experiencing community spread of the disease. Crowded travel settings, like airports, may increase chances of getting COVID-19, if there are other travelers with coronavirus infection. There are several things you should consider when deciding whether it is safe for you to travel. Check the [CDC's guidance on things to consider prior to travel](#).

Panhandle Health District provides over 40 different public health programs to families, individuals and organizations in northern Idaho. From food and drinking water safety to health education and disease control, public health services are critical to ensure our community is a safe and healthy place to live, work and play.

The PHD team is made up of nurses, nutritionists, environmental health specialists, health educators and many other dedicated professionals with a common goal to deliver vital public health services.

Panhandle Health District is one of seven health districts in the state of Idaho.
